Pinnacle Web

Get control of your Pinnacle System

Control your Pinnacle System from any browser – any time, any where.

Access your system – any time, any where

When Pinnacle Web server is available to a domain name or public IP, access to the application becomes global. All connections are password protected and encrypted.

Note: Pinnacle Web will not encode cards and will not support a capture card. This is only supported on Pinnacle Servers and Pinnacle Rich Clients.

Go beyond the Window Operating System

Pinnacle can be accessed from any computer in the network through any Web browser, such as Internet Explorer, Safari, Firefox and more. Now you can run Pinnacle Web Clients from Unix, Linux, Macintosh and PDAs.

Easy to install and upgrade

The Pinnacle Web application is installed on the same computer that is running the Pinnacle database server. All updates or upgrades are performed at the database server – eliminating the need to update the clients.

Enhanced Security

Pinnacle and all its data are secure on a central server behind the firewall. Transmissions are fully encrypted including Secure Socket Layer (SSL) and 256-bit AES encryption.

Virtual desktop

Pinnacle Web Client allows you to run the Pinnacle application, Pinnacle utilities, and any other programs that you expose on the virtual desktop to the operator.
