

Integrates access control events with live video and controls Costar DVRs, NVRs and cameras anywhere with no licensing

Pinnacle Argos™ is a Web based application that can be deployed from any computer running Microsoft Internet Explorer. Argos is fully integrated with Pinnacle and using Pinnacle Filters and Filters Assignment you can call up a camera on the Argos monitor screen, record video, and call up presets on a PAN-TILT-ZOOM camera. No camera licensing or video drivers are required.

Users can control multiple sites with Pinnacle Argos™ by allowing multiple DVRs to be added to the system. The systems is expandable with Pinnacle version 7 and later as a standard feature allowing the control of 32 cameras, upgradeable to 64, 128 or unlimited cameras.

The screenshot displays the Pinnacle Argos web interface. At the top, there is a navigation bar with the Sielox logo and menu items: Video Devices, Configuration, View Archive, Help, and Logout. The main content area is divided into two sections: 'Live Video: Sielox' on the left, which shows a 4x4 grid of 16 live video feeds from various cameras, and 'Playback' on the right, which shows a larger video window displaying a car on a blue carpet. Below the video feeds, there are control panels for 'CAM PRESETS' (VIEW, SET) and playback controls (play, stop, previous, next, first, last). At the bottom, there is an event log table with columns for Event ID, Event, Date/Time, Description, Device, and Action.

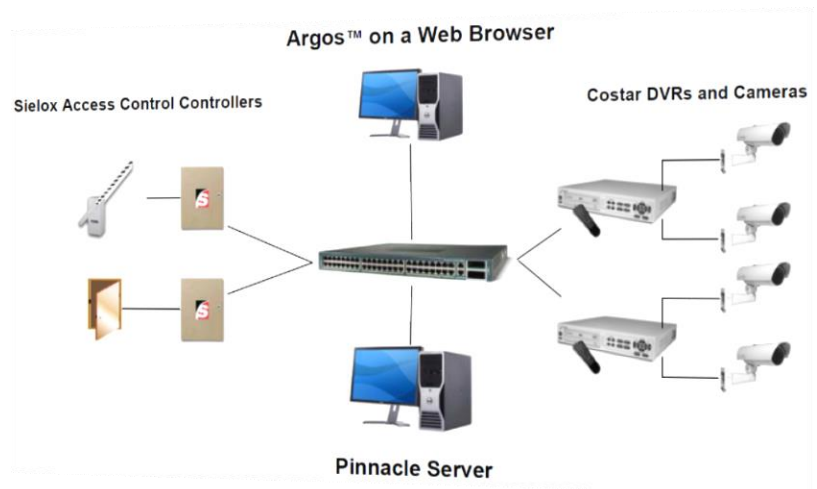

Event ID	Event	Date/Time	Description	Device	Action
62	Input Active	03/23/2009 12:43	001-Terminal Controller 1007	001-Input 1017	Display Video: Filter Attribute at Sielox DVR Shunt 1
